Subject: RE: Niagara County Sites-Weston

Eric,

I apologize about the delayed response but I have been working with management within the company to determine Chad's availability to continue to support our program going forward.

First off, I certainly appreciate you providing all of the positive feedback in regards to Chad and the rest of the crews performance throughout the life of these projects! As you know, Chad is not a member of the dedicated CRT on the RST 3 Contract but rather supporting these projects through the ID/IQ portion of the contract. Unfortunately it looks like Chad is going to be needed back in Region 6 for some Army Core work that he has been proposed for. Chad will continue to support the backend of these projects for the next month or so but then it looks like he is going to shift over to this other work. Chad is extremely dedicated and engaged in the success of these projects and he has assured me that he will support us to the best of his abilities as long as needed. I could not be happier in regards to how well Chad has supported our program and continued to meet/exceed your expectations over the last year+! However, it is looking like that support will not be full time in about a month from now. Buster has been coordinating with Chad over the last few weeks to ensure we pass all of that Site-Specific knowledge off so that we can continue to run with the deliverable end of things, including the ongoing enforcement work associated with NFB. Patrick will be fully engaged in these projects as we move forward which should certainly allow for the successful completion of all required deliverables. If you have any questions please let me know.

Thanks,

Tim

Subject: Niagara County Sites-Weston

Good Morning Tim:

How are you? I wanted to once again tell you how pleased I am with Weston personnel with our Niagara County Sites. The challenges of the sites were many but everyone at the site and in the office always took them on efficiently and professionally. As we close this chapter of this assessment/removal phase at the sites, I wanted to express that again.

In moving forward, we will still have a lot of technical work to complete. Organizing data products on the OneDrive, finalizing data products, validate data, completion of Holy Trinity Cemetery Action Memo, and enforcement research and historical document organization. With all of this work, I am requesting that Chad Conway work with the team. His experience on the site and his hands on work with the enforcement data so far is invaluable.

Thanks

Regards,
